**Colchester: Return by 5pm 11th August 2017**

**Bradfield is regarded as a sustainable village with a number of services and facilities including a village shop, primary school and public house. The village is able to accept further development that would be socially and environmentally appropriate.**

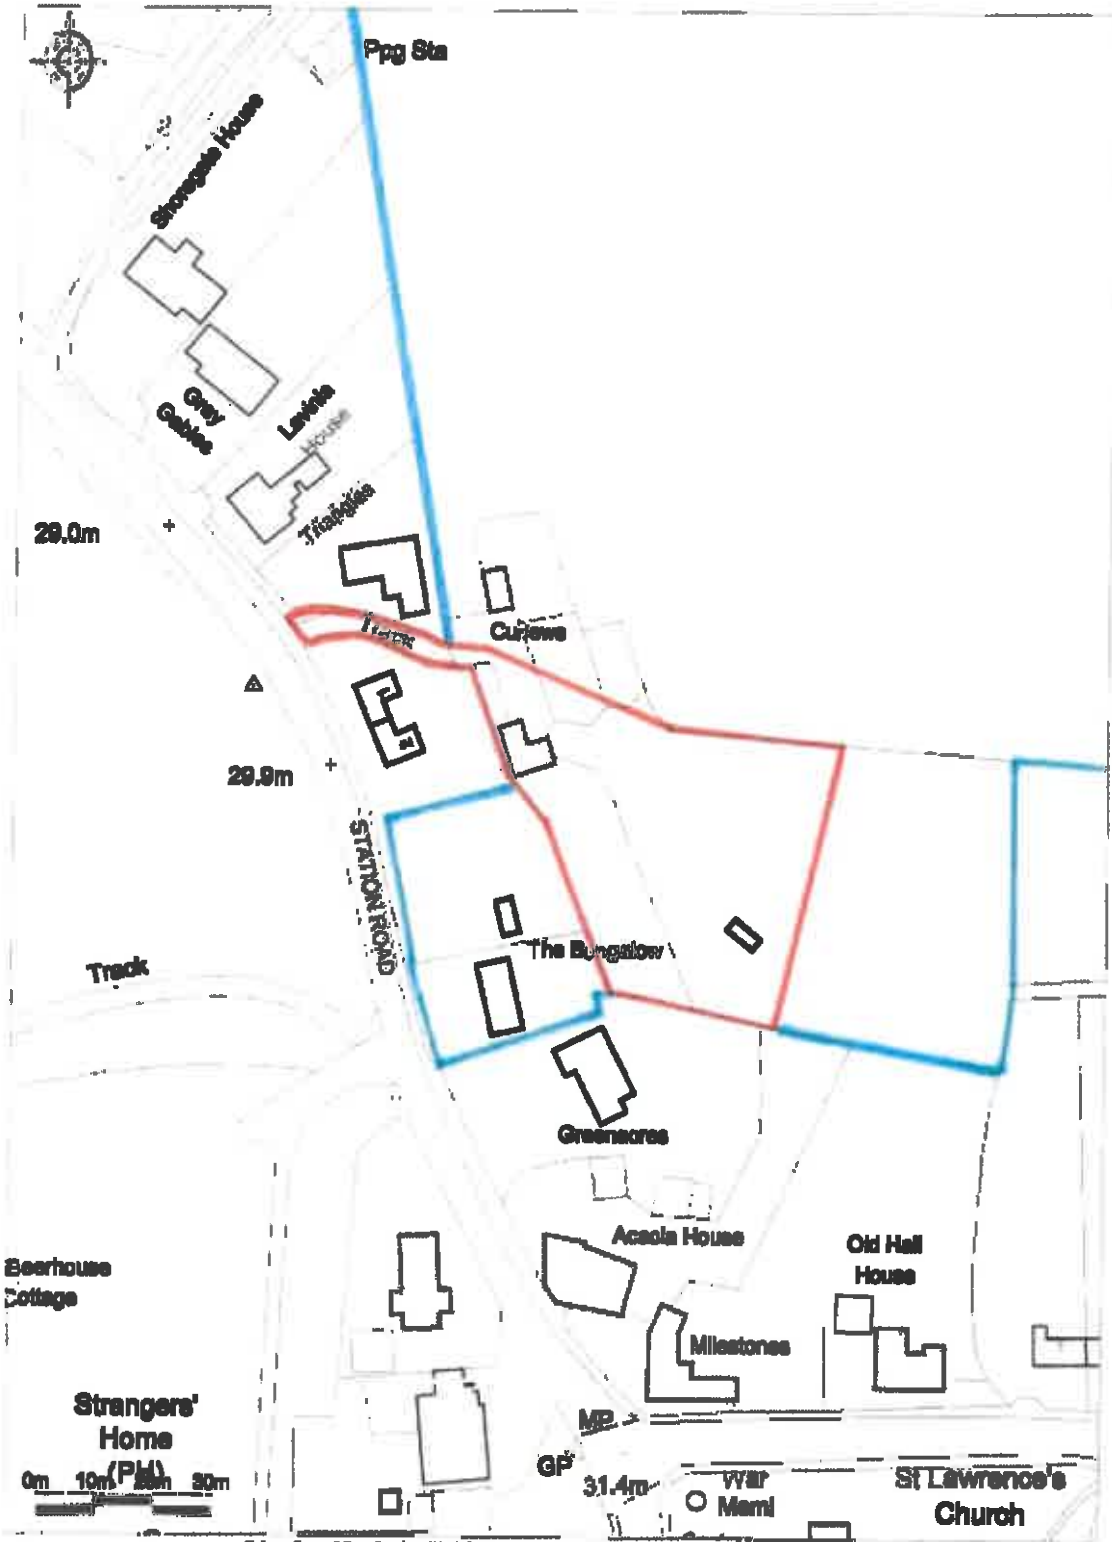

**The site shown on the attached plan affecting land to the east of Station Road would meet the three tests of sustainability as set out in the NPPF. This land is not used for agricultural purposes due to its awkward shape. In recent years it has been used as a paddock. It is entirely screened from neighbouring properties to the south. By allowing development of this site, an appropriate and reasonable level of development could be provided to help sustain and improve local services without affecting the rural character of the area. The site is within walking distance of local services and will be in keeping with the frontage development elsewhere along the road. Vehicular access to the site would meet the County Council visibility splays while the development would not necessitate the removal of any trees or hedgerow.**

**At the heart of The National Planning Policy Framework is the presumption in favour of sustainable development and advises local planning authorities should follow this approach and encourage the effective use of land, providing that it is not of high environmental value.**

**The scheme is considered to be in a sustainable location as the development is situated close to the defined development boundary for the village. Bradfield is further identified by the Council as being a settlement where some development can take place. It is therefore considered by the Council to be a sustainable location for growth to support the vitality and vibrancy of the rural area.**

**The proposal would contribute economically to the area by supporting existing construction jobs and also increasing the population within the village to help sustain local services and amenities.**

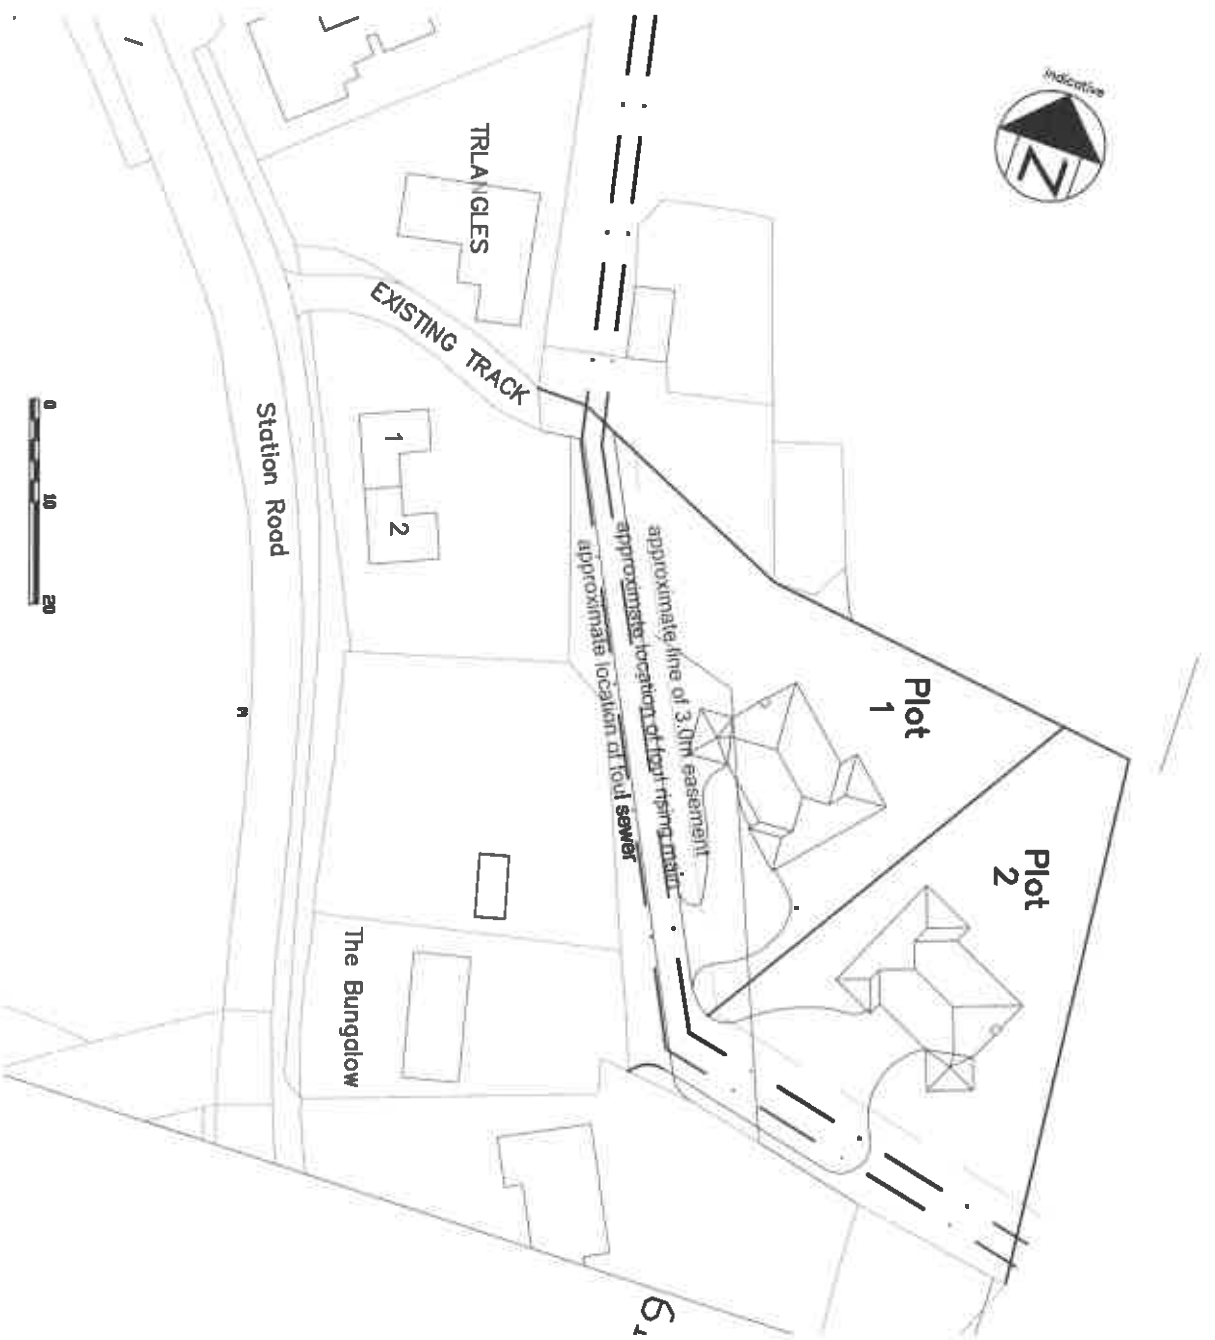

**As a result the scheme would meet the comments set out within paragraph 14 of the NPPF in respect of a positive opportunity to meet the development needs of the area. Moreover, the allocation of this site would accord with the core planning principles as set out within paragraph 17 by ensuring the scheme enhances and improves the place in which people live their lives. The proposal is not only sustainable, it is deliverable as required by paragraphs 47 & 49 of the NPPF.**
