Folly Farm, Frinton Road, Thorpe le Soken

The site shown on the attached plan should be considered as suitable for residential development. Planning permission has recently been granted for sites directly opposite at Parkers Nurseries (3 dwellings) and at Rose Farm (2 dwellings).

Thorpe le Soken is a large village which is classed as a key rural settlement. As such the settlement is considered to be capable of accommodating a modest amount of sustainable housing growth. This approach is evident within recent decisions such as on the land off Landermere Road and very decent appeal decision for St. Michaels Road

The village has a range of full services within the settlement including shops, post office and two public houses which are situated in the centre of the village. The village is also served by a regular bus routes. Within the immediate vicinity of the site is a bus stop which provides routes to Clacton-on-Sea, Harwich as well as Colchester. The local train station in Thorpe-le-Soken also provide sustainable transport routes to larger towns and cities such as Colchester and London Liverpool Street (via Colchester) and smaller towns such as Frinton-on-Sea. It is therefore considered to be a sustainable location for development.

The site therefore forms a logical small development site on the edge of a settlement which will contribute towards the housing supply in the area and therefore permission should be granted unless any adverse effects of doing so would significantly and demonstrably outweigh the benefits. The principle of development is therefore considered to be acceptable.

The proposal needs to be considered against the three dimensions within the definition of 'sustainable development,' providing for an economic, social and environmental role. The scheme is considered to be in a sustainable location with facilities and services such as shops, public house, take-aways, sports and community facilities are within walking distance and a comfortable distance where they can be cycled to. The proposal would contribute economically to the area by supporting existing construction jobs and also increasing the population within the village to help sustain local services and amenities.

In the context of the existing frontage housing along Frinton Road, the scheme will represent a continuation of the existing linear development, the allocation of this site will not extend development beyond the public perception of the village limits in the locality. As such it will not be detrimental to the character and appearance of the surrounding countryside.

On the basis of the above, it is considered that the site is within a location where future occupiers would have access to local community and social facilities as well as access to employment opportunities through public transport links. The site is therefore considered to be a sustainable location for growth as it performs extremely well against the three tests for sustainability as set out in paragraph 7 of the NPPF. As a result the scheme would meet the comments set out within paragraph 14 of the NPPF in respect of a positive opportunity to meet the development needs of the area. Moreover, the allocation of this site would accord with the core planning principles as set out within paragraph 17 by ensuring the scheme enhances and improves the place in which people live their lives. The proposal is not only sustainable, it is deliverable as required by paragraphs 47 & 49 of the NPPF.
