Dear Sir,

I refer to my Local Consultation 1022308 dated 24/07/2017. I now consider a number of changes have taken place since 2017.

The main item is the inclusion of the site into the new settlement development boundary .

The 5 year supply 550 homes a year target has been adjusted to 863 which would account for the rejection on numbers.

The Zakros entrance in windmill road with removal of the front garage and sheds will open up the 1.8 acre site.

More older people have realised they would far rather live close to a shop and post office to provide them with a purpose for looking

after themselves without being put in a home and forgotten about.

The site is approx 15 yards from the front of the shop and post office.

Bus stops for Harwich and colchester are approx 10 yards from the shop and postoffice

I have an interest in family land adjacent to westleigh where our family once lived its possible to utilise this as public open space .

I am 70 this year I have lived in the village all my life I am not a builder or developer .

I would like to think the local community would benefit from this.

I would like to thank andrea Copsey the programme officer for her guidance through the examination process if agreement cannot

be reached to include this in the development boundary I would ask andrea to put this forward under matters 7.

Yours Sincerely

Glyn Graves
